ARTHUR F. GRAY.

PRINTED AT THE SALEM PRESS,
SALEM, MASS.
1884.
A

COMPLETE LIST

OF

THE SCIENTIFIC PAPERS

OF

THOMAS BLAND, F. G. S.

FROM 1852 TO 1883.

BY

ARTHUR F. GRAY.

PRINTED AT THE SALEM PRESS,
SALEM, MASS.
1884.
PREFACE.

The compiler takes pleasure in placing before students of American Conchology, a complete list of the scientific writings of Mr. Thomas Bland, who has so thoroughly studied the mollusks of North America and the West Indies. His contributions to Geographical Distribution of the Terrestrial Mollusks, his notes on Classification, Dentition, Anatomy, etc., have been most valuable; and it is with the hope that the list may render these papers more accessible that their titles are now brought together in chronological order.

Many of the papers have been published jointly with Mr. Wm. G. Binney; such joint publications are indicated by an asterisk (*) which is prefixed to their respective titles.

The papers published in the "Journal de Conchyliologie," were translated into French by M. H. Crosse from Mr. Bland's original manuscripts.

The compiler here acknowledges the kindly aid of Mr. Bland who has most materially aided him in the preparation of the list.

Arthur F. Gray.

Danversport, Mass.,
Feb., 1884.
LIST OF PAPERS.
1852-1883.

2. On the Clausiliæ of America. Same, pp. 224-228; same date.

7. On the Absorption of Parts of the Internal Structure of their Shells by the Animals of Stoastoma, Lucidella, Trochatella, Helicina and Proserpina.—Same, pp. 75-77.

[This paper contains the following notes, viz.:
I. On the Occurrence of Pupa bicolor, Hutton, in the Island of St. Thomas.
II. On the Animal of Proserpina.
III. On the Structure of the Axis of the Shell of Cylindrella.
IV. Corrections and Additional Facts, especially as to the Habitat of Sundry Species.]

[Helix Edwardsi and H. sculptilis described.]
List of Scientific Papers.

[These papers were also issued in pamphlet form:—Part I, New York, 1858; Part II, New York, 1860; Part III, New York, 1862; all repaged. The new species described are Helix pastuloides, Postelliana, auriformis, espiloca, introferens, Christyi, Wheatleyi, Carpenteriana, Downiana, triodontoides and labrosa.]

[This paper was published jointly with Dr. J. G. Cooper; it contains descriptions of Helice polygyrella and Mullani.]

13. On the Geographical Distribution of the Genera and Species of Land Shells of the West India Islands, with a Catalogue of the species of each Island.—Same, pp. 335–361, June, 1861.

[Also published in pamphlet form, with dedication to the memory of the then late Prof. C. B. Adams and his son C. B. Adams, with Preface, 1861.]

[Proserpina Swifti described.]

[Together with and included under this title, will be found a "Catalogue of the Species of Helix which inhabit North America (exclusive of the Pacific Coast and Mexico) arranged especially with reference to the forms of the Shells and showing the Genera and Subgenera in which they are placed by Pfeiffer and Albers; "also "Descriptions of the principal Genera and Subgenera, in which certain North American Species of Helix are arranged by Albers, "Die Helicen" 2nd Ed.," with an Addendum containing "Catalogue of the Species of Helix which inhabit North America West of the Rocky Mountains, from the extreme North to the northern limit of Mexico, exclusive of those marked ❧ in the preceding Catalogue.""]

List of Scientific Papers.

List of Scientific Papers.

List of Scientific Papers.

[Helicina Gloyeri.]

[In connection with above "Note on Helix inversicolor, Fer. and other species from Mauritius," pp. 169–170, appeared.]

[Hemphillia glandulosa described.]

List of Scientific Papers.

[Helix (Mesodon) Wetherbyi described.]

[Species described are: Zonites Lunsingi, Helix Sargenti, Macrocera- num Swifti, M. Klativus.]

[This paper was appended to a paper “On Genitalia, Jaw and Lingual Dentition of certain species of Pulmonata,” by W. G. Binney.]

[Helix Ingersollii described.]
61. Examen critique de certaines espèces du Continent Américan et des Antilles, décrites dans la Monographie des Helicina (Conchologica Iconica) de L. Reeve (2) comme appartenant à ce genre.—Journ. de Conch., Vol. XV, pp. 245-252, June, 1875.

[Amphibulima Rowsonis and Helix Van Nostrandi described.]

[A list published for private distribution.]

[These Notes have especial reference to the colors of the shells of Terrestrial Mollusks.]

[Triodopsis Levettei described.]

67. On the Relations of the Flora and Fauna of Santa Cruz, West Indies.—Same, pp. 117-126, Jan., 1881.

[Zonites Wheatleyi and Z. petrophilus.]

70. Notes on the Land Shells which inhabit the Islands of Aruba, Curacao and Buen Ayre.—Same, pp. May, 1883.
